

New skills for all...

WE teamed up with The Calico Group to help our students gain life skills and well being. The Calico enterprise aims to give information and advice to our young people and enable them to gain skills for work, training or an apprenticeship.

CAMPER VAN CREATIONS

STUDENTS will be able to develop their mechanic's skills as well as their interior design skills as part of a great new project.

Staff picked up this camper van to revamp and work on with our budding mechanics and our aim is to let students maintain this vehicle with guidance and help. We can't wait to see the finished product!

ECO WARRIORS

COAL Clough Academy has an excellent outdoor education programme in place and our students thrive from this type of learning. Some of them visited Brockholes Nature Reserve to take part in the My Place Eco Therapy project and built shelters as part of the programme. This is a great way of letting them express their creative flair as well as working on their teambuilding and great strengths.

COOKING continues to be some of our student's great strengths. These boys cooked a delicious garlic chicken during a class held at Blackburn Youth Zone as they continue to develop their skills.
