

OUTDOOR SKILLS FOR LIFE...

OUR Year 9s got into some interesting situations during their most recent outdoor education trip. The students went to Brimham in Yorkshire and had a go at weaselling which is a pursuit ideal for our children who love the adventure of outdoors. Weaselling involves scrambling through very tight and compact spaces, around twisty passages and involves discovering all kinds of rocks, nooks and crannies. Mr Lambert's class get to discover some great adventures with their outdoor education lessons and this was just one. It was a great session for Coal Clough students and a fantastic learning experience helping them to develop their health and wellbeing.

FLOWER POWER

OUR students got quite creative this week with a fresh flower arranging session. Some beautiful displays were made during the craft session and were taken home to some very lucky receivers! Well done to all who took part.

Bring your pet to school...

WE had a slithering visit from Sydney the snake this week. He was brought in by Joe on Bring Your Pet To School Day and it was great for all students and staff to meet and greet the snake and have a hold!

ECO WARRIORS

OUR year 10 students took to rock climbing this week during outdoor education—great way to solve problems and overcome challenges!

OUR year eights took part in an Ecotherapy lesson and gathered some autumnal elements to produce items for our outdoors.

This project that aims to empower Coal Clough students encouraging them to take action in environmental activities to improve areas for wildlife, communities and their own wellbeing.
