

## Our students visit to Pendleside Hospice

Students from Coal Clough visited Pendleside Hospice to see the amazing care and fantastic work that is carried out there.

The registered charity rely on donations to keep the hospice running and to help them our students are planning on doing a sponsored cycle on the 27th October to raise a target amount

of £300. This is an excellent way to encourage our students to get fit but to also raise money for people within the community who need it the most.

Sponsor forms will be making their way home with the children and we would appreciate your support ahead of the sponsored bike ride on October 27th, just before we break up for half term.

## Outdoor education

### Bear Grylls –Style!

Some of our students were taken on an outdoor education session and learned how to survive in the woods.

The boys were able to learn skills that are needed for survival, such as building a fire, collecting water from the stream and all worked together to put up their shelter.

A great example of team work and life skills from the children, well done! In other outdoor education classes students also went to Gisburn park riding their bikes.

## Ministry of Food continues to be a great success and students learn how to save a heart at Blackburn Youth Zone

WE have had a fantastic time at Blackburn Youth Zone over the past few weeks.

Our students continue to take part in the Ministry of Food—cooking up fresh meals and learning new skills. They are thoroughly enjoying this engaging activity and have been educated well, inspiring themselves to eat well and improve their own health and wellbeing.

Some of our year tens also went along to the youth zone to see how they could save a life! It was Restart A Heart Day—a life saving campaign by the British Heart foundation. The students enjoyed this interactive session and were excellent at engaging!

**Dates for your Diary—School closes on Friday 27th October for half term— school will be back open on Tuesday 7th November.**
